Irrigation Innovation Consortium-Supported Project Datasets

Please use a separate sheet for each dataset. Answers are automatically saved. Questions? Contact Diane DeJong: diane.de\_jong@colostate.edu.

Thank you!

Question	Your answer
Project name	Improved irrigation scheduling combining soil water supply and atmospheric evaporative
	demand
Project background	Quantify and compare the water use efficiency (i.e. yield per applied irrigation) of the SDD
	algorithm vs. other common irrigation practices at two study sites in Nebraska using a
	randomized trial with 3 replicates.
Dataset name	Arable
Primary author	Trenton Franz, UNL, trenton.franz@unl.edu
Include first & last name, institution affiliation, and email address.	
Primary contact	Trenton Franz, UNL, trenton.franz@unl.edu
The primary contact may be the same or different from the primary author.	
Include first & last name, institution affiliation, and email address.	
Dataset description	Arable Mark 2 units and sentek soil moisutre sensors were included in SDD experiment
Please provide a brief, clear summary description of the dataset contents. Indicate as	
applicable: purpose and scope; time period; areas of investigation; and any other special	
characteristics.	
Spatial coverage	The experiment took place the research and extention facility in North Platte NE on their
Please be specific as possible about the geographic coverage of your data, and record the	sprinkler corn field.
information according to defined standards, such as FGDC or the Getty Thesaurus of	
Geographic Names. You can enter lat/long data, county names, state names, etc.	
Temporal coverage	May 2021 to Oct 2023
Describe the temporal coverage of your dataset:	
Start: Time of day, Date, Month, Year	
Finish: Time of day, Date, Month Year	
Re-use limitations	None
Describe known problems or caveats that would limit reuse of the data (e.g., uncertainty,	
sampling problems, blanks, quality control samples) and/or that future potential users of	
your dataset should know about. Or indicate "None."	
Citations	None to date
Please include full citations and DOIs for articles published based on or related to this	
dataset. Or indicate "None."	
Keywords	irrigation scheduling; soil water; evaporative demand; remote sensing; algorithms; water use
Please add a few appropriate National Agricultural Library keywords:	efficiency; application programming interface
https://agclass.nal.usda.gov/vocabularies/nalt	

Tags	Arable Mark 2
Please add a few of your own user-defined tags that would be useful to others who might	
use your dataset in the future.	
Acronyms & abbreviations	SDD - supply-demand dynamics; API - application programming interface; TAPS - Testing Ag
Please define any acronyms, site abbreviations, or other project specific designations used in	Performance Solutions; CRNS - cosmic ray neutron sensor; AU - Aspiring Universe
your dataset. Or indicate "none."	Corporation (subcontractor)
Other dataset storage location	None to date
Has this dataset already been uploaded elsewhere? Yes or No	
Reasons may include a requirement as part of publishing a paper or storing data on GitHub or other locations to make accessible to others.	
If yes, please provide the link or other information to explain where the dataset is located and where or how it can be accessed.
