Thank you!

Question	Your answer
Project name	Closing the loop on sustainable plasticulture
Project background	The Irrigation Industry manufactures approximately 250 million lbs. of plastic drip tubes, tapes, and emitter lines in the USA alone. Some of these products will be utilized in fields or landscapes for a long time (10-30 years), while other products, such as thin-mil drip tapes, are only used for one crop growing cycle (4 months). It is estimated that a small percent of these products are recycled. Much of the un-recycled and even "recycled" plastic drip products may end up in landfills or other non-renewable waste streams. We propose to investigate the technical and economic feasibility of using recycled thin-walled single-use drip tape as source material for thick-walled long-life drip tubing.
Dataset name	Demo and test results of thick-walled tubing at Fresno State University Agricultural Laboratory (UAL)
Primary author Include first & last name, institution affiliation, and email address.	Charles Hillyer, Center for Irrigation Technology, California State University - Fresno, hillyer@mail.fresnostate.edu
Primary contact The primary contact may be the same or different from the primary author. Include first & last name, institution affiliation, and email address.	Charles Hillyer, Center for Irrigation Technology, California State University - Fresno, hillyer@mail.fresnostate.edu
Dataset description Please provide a brief, clear summary description of the dataset contents. Indicate as applicable: purpose and scope; time period; areas of investigation; and any other special characteristics.	The expected lifetime of the recycled driplines is far greater than the maximum duration of the project. CIT will monitor a long-term (up to three years) demonstration and test of the thick-walled tubing at the Fresno State University Agricultural Laboratory (UAL). The pallet of tubing delivered to CIT, less the tubing used for testing, was delivered to the Viticulture and Enology Research Center's Vineyard Manager. The thick-walled recycled tubing produced for this study will be installed in an area that is repeatedly (every few years) replaced for teaching purposes. The exact location of the recycled tubing (probably on grapevines) will be determined based on UAL operational needs. The performance of the recycled products will be assessed through periodic observation and communication between UAL and CIT staff. This combination of working relationship and proximity ensures that minimal support will be needed for long-term monitoring. Any potential performance differences will be identified and recorded.
Spatial coverage Please be specific as possible about the geographic coverage of your data, and record the information according to defined standards, such as FGDC or the Getty Thesaurus of Geographic Names. You can enter lat/long data, county names, state names, etc.	Fresno State University Agricultural Laboratory

Temporal coverage Describe the temporal coverage of your dataset: Start: Time of day, Date, Month, Year Finish: Time of day, Date, Month Year	TBD
Re-use limitations Describe known problems or caveats that would limit reuse of the data (e.g., uncertainty, sampling problems, blanks, quality control samples) and/or that future potential users of your dataset should know about. Or indicate "None."	None
Citations Please include full citations and DOIs for articles published based on or related to this dataset. Or indicate "None."	None
Keywords Please add a few appropriate National Agricultural Library keywords: https://agclass.nal.usda.gov/vocabularies/nalt	recycled plastic; drip irrigation; economic feasibility; plasticulture
Tags Please add a few of your own user-defined tags that would be useful to others who might use your dataset in the future.	drip tube; drip tape; recycled resin;
Acronyms & abbreviations Please define any acronyms, site abbreviations, or other project specific designations used in your dataset. Or indicate "none."	CIT: Center for Irrigation Technology; UAL: Fresno State University Agricultural Laboratory
Other dataset storage location Has this dataset already been uploaded elsewhere? Yes or No Reasons may include a requirement as part of publishing a paper or storing data on GitHub or other locations to make accessible to others. If yes, please provide the link or other information to explain where the dataset is located and where or how it can be accessed.	No
